Attachments: CA major POTWs and Class 1 facilities.xlsx

Hi Tim,

Here is the chart that shows what POTWs with design flows of > 1 mgd are currently in EPA Region 9's biosolids database. As noted below, the non-NPDES POTWs have "NPDES numbers" starting with CAU.....

Thanks for assisting in reviewing this!

Lauren

Subject: Major POTWs in ICIS

Hi Steve,

The attached chart shows all the California POTWs that we have identified to date as being majors or other Class 1 Sludge Management Facilities for purposes of biosolids annual reporting. Column "C" shows their NPDES # or the number we have given them for ICIS. Non-NPDES facilities have a number starting with "CAU....." All these facilities should be in ICIS now – if you find any with a number starting with "CAU....." that are not in ICIS, they need to be put in.

The facilities with a **blank** in Column C need to be given an NPDES number. These are POTWs that discharge effluent through the same outfall as another POTW, so have the same NPDES number, but handle sludge separately and submit different reports.

The State of California is reviewing this information to see if there are other major non-NPDES POTWs not listed here.

This list does not include major POTWs that pipe their untreated sludge to another POTW within the same agency for treatment.

Thanks,

Lauren
